# SRN ADARSH COLLEGE BENGALURU-18 DEPARTMENT OF BCA

#### **BCA Course Objectives and Outcomes**

#### **BCA Semester-I**

**Subject: English** 

Subject Code: BCA-102T Periods per week: 4

Duration of period: 50 minutes

#### **Course Objectives**

- To enable the learner to communicate effectively and appropriately in real life situation.
- To use English effectively for study purpose across the curriculum.
- To revise and reinforce structure already learnt.
- To develop and integrate the use of four language skills:
   a) Reading, b) Writing, c) Listening and d) Speaking

#### **Course Outcomes**

On completion of this course, the students will be able to:

- Reading Skills: Ability to read English with ability to read English with understanding and decipher paragraph patterns, writer techniques and conclusions.
- Writing Skills: Skill to develop the ability to write English correctly and master the mechanics of writing the use of correct punctuation marks and capital letter.
- **Listening Skills:** Ability to understand English when it is spoken in various contexts.
- **Speaking Skills:** Develop the ability to speak intelligibly using appropriate word stress, sentence stress and elementary intonation patterns.

### **Subject: Problems Solving Techniques Using C Programming**

Subject Code: BCA-103T

Periods per week: 4 Practicals per week: 4

Duration of period: 50 minutes

- To introduce students to a powerful programming language C.
- To understand the basic structure of a C program.
- To gain knowledge of various programming errors.

- To enable the students to make flowchart and design an algorithm for a given problem.
- To enable the students to develop logics and programs.

On completion of this course, the students will be able to:

- In-depth understanding of various concepts of C language.
- Ability to read, understand and trace the execution of programs.
- Skill to debug a program.
- Skill to write program code in C to solve real world problems.

#### **Subject: Computer Organizations**

Subject Code: BCA-104T

Periods per week: 4 Practicals per week: 4

Duration of period: 50 minutes

#### **Course Objectives:**

- To understand the structure, function and characteristics of computer systems.
- To understand the design of the various functional units and components of computers.
- To identify the elements of modern instructions sets and their impact on processor design.
- To explain the function of each element of a memory hierarchy
- To identify and compare different methods for computer I/O.

#### **Course Outcomes:**

On completion of this course, the students will be able to:

On completion of this course, the students will be able to:

- Demonstrate computer architecture concepts related to design of modern processors, memories and I/Os.
- Analyze the performance of commercially available computers.
- To develop logic for assembly language programming

### **Subject: Discrete Mathematics**

Subject Code105T Periods per week: 5

Duration of period: 50 minutes

- To understand and solve discrete mathematical problems.
- To impart knowledge regarding relevant topics such as set Theory, basic logic, graphs, trees or discrete probability.
- To familiarize students with linear Algebra, differential and integral calculus, numerical methods and statistics.

On completion of this course, the students will be able to:

- Develops formal reasoning.
- Creates habit of raising questions.
- Knowledge regarding the use of Discrete Mathematics in Computer Science.
- Helpful in formulating questions.
- Ability to communicate knowledge, capabilities and skills related to the computer engineer profession.

#### **BCA Semester-II**

**Subject: English** 

Subject Code: BCA-202T Periods per week: 4

Duration of period: 50 minutes

**Course Objectives** 

- To enable the learner to communicate effectively and appropriately in real life situation.
- To use English effectively for study purpose across the curriculum.
- To revise and reinforce structure already learnt.
- To develop and integrate the use of four language skills:
  - a) Reading, b) Writing, c) Listening and d) Speaking

#### **Course Outcomes**

On completion of this course, the students will be able to:

- **Reading Skills:** Ability to read English with ability to read English with understanding and decipher paragraph patterns, writer techniques and conclusions.
- **Writing Skills:** Skill to develop the ability to write English correctly and master the mechanics of writing the use of correct punctuation marks and capital letter.
- **Listening Skills:** Ability to understand English when it is spoken in various contexts.
- **Speaking Skills:** Develop the ability to speak intelligibly using appropriate word stress, sentence stress and elementary intonation patterns.

**Subject: Data Structures** 

Subject Code: BCA-203T Periods per week: 4 Practicals per week: 3 Duration of period: 50 minutes

#### **Course Objectives**

- To familiarize the students with data structures used for representing data in memory like Arrays, Linked Lists, Graphs, Trees etc.
- To analyze the performance of algorithms.
- To learn how to apply algorithms of data structures on data.
- To gain knowledge of various methods used in data structures such as brute force, divide and conquer, greedy, etc.

#### **Course Outcomes**

On completion of this course, the students will be able to:

- Skill to analyze algorithms and to determine algorithm correctness and their time efficiency.
- Knowledge of advanced abstract data type (ADT) and data structures and their implementations.
- Ability to implement algorithms to perform various operations on data structures.

### **Subject: Database Management Systems**

Subject Code: BCA-204T

Periods per week: 4 Practicals per week: 4

Duration of period: 50 minutes

### **Course Objectives**

- To introduce the students to the database system.
- To learn how to design a database by using different models.
- To enable the students to understand the database handling during execution of the transactions.
- To understand the handling of database by concurrent users.
- To gain complete knowledge of SQL and PL/SQL.

#### **Course Outcomes**

On completion of this course, the students will be able to:

- Familiarization with Database Management System.
- Comprehensive knowledge of database models.
- Ability to code database transactions using SQL.
- Skill to write PL/SQL programs.

### **Subject: Numerical Methods and Statistical Techniques**

Subject Code: Paper-III Periods per week: 4 Practicals per week:4

Duration of period: 50 minutes

- To learn how to perform error analysis for arithmetic operations.
- To demonstrate working of various numerical methods.
- To provide a basic understanding of the derivation and use of methods of interpolation and numerical integration.
- To impart knowledge of various statistical techniques.
- To develop students' understanding through laboratory activities to solve problems related to above stated concepts.

On completion of this course, the students will be able to:

- Skill to choose and apply appropriate numerical methods to obtain approximate solutions to difficult mathematical problems.
- Ability to apply various statistical techniques such as Measures of Central Tendency and Dispersion.
- Understanding of relationship between variables using the method of Correlation and Trend Fit Analysis.
- Skill to execute programs of various Numerical Methods and Statistical Techniques for solving mathematical problems.

#### **BCA Semester-III**

**Subject: English** 

Subject Code: BCA-302T Periods per week: 4

Duration of period: 50 minutes

#### **Course Objectives**

- To enable the learner to communicate effectively and appropriately in real life situation.
- To use English effectively for study purpose across the curriculum.
- To revise and reinforce structure already learnt.
- To develop and integrate the use of four language skills:
   a) Reading, b) Writing, c) Listening and d) Speaking

#### **Course Outcomes**

- Reading Skills: Ability to read English with ability to read English with understanding and decipher paragraph patterns, writer techniques and conclusions.
- Writing Skills: Skill to develop the ability to write English correctly and master the mechanics of writing the use of correct punctuation marks and capital letter.

- **Listening Skills:** Ability to understand English when it is spoken in various contexts.
- **Speaking Skills:** Develop the ability to speak intelligibly using appropriate word stress, sentence stress and elementary intonation patterns.

#### **Subject: Object Oriented Programming- C++**

Subject Code: BCA-303T Periods per week: 4 Practicals per week: 4

Duration of period: 50 minutes

#### **Course Objectives**

- To give an overview of benefits of Object Oriented Programming (OOP) approach over the Traditional Programming approach.
- To deliver comprehensive view of OOP concept.
- To impart detailed knowledge of a powerful object oriented programming language C++.

#### **Course Outcomes**

On completion of this course, the students will be able to:

- Familiarization with a widely used programming concept Object Oriented Programming.
- Develop logical thinking.
- Skill to write codes in C++ by applying concept of OOP, such as Objects, Classes, Constructors, Inheritance etc., to solve mathematical or real world problems .
- Ability to isolate and fix common errors in C++ programs.

### **Subject: Accounting And Financial Management**

Subject Code: BCA-304T Periods per week: 4

Duration of period: 50 minutes

### **Course Objectives**

- To help the students to develop cognizance of the importance of Financial Management in corporate valuation
- To enable students to describe how people analyze the corporate leverage under different conditions and understand why people valuate different corporates in different manner.
- To provide the students to analyze specific characteristics of Supply Chain Industry and their future action for cash flow
- To enable students to synthesize related information and evaluate options for most logical and optimal solution such that they would be able to predict and control Debt Equity incurrence and improve results.

#### **Course Outcomes**

On completion of this course, the students will be able to:

- Demonstrate the applicability of the concept of Financial Management to understand the managerial Decisions and Corporate Capital Structure
- Apply the Leverage and EBIT EPS Analysis associate with Financial Data in the corporate
- Analyse the complexities associated with management of cost of funds in the capital Structure
- Demonstrate how the concepts of financial management and investment, financing and dividend policy decisions could integrate while identification and resolution of problems pertaining to LSCM Sector
- Demonstrate how risk is assessed

#### **Subject: Operating Systems**

Subject Code: BCA-305T Periods per week: 5

Duration of period: 50 minutes

#### **Course Objectives**

- To deliver a detailed knowledge of integral software in a computer system – Operating System.
- To understand the working of operating system as a resource manager.
- To familiarize the students with Process and Memory management.
- To describe the problem of process synchronization and its solution.

#### **Course Outcomes**

On completion of this course, the students will be able to:

- Ability to apply CPU scheduling algorithms to manage tasks.
- Ability to apply Disk scheduling algorithms to manage tasks.
- Initiation into the process of applying memory management methods and allocation policies.
- Knowledge of methods of prevention and recovery from a system deadlock.

#### **BCA Semester-IV**

### **Subject: English**

Subject Code: BCA-302T Periods per week: 4

Duration of period: 50 minutes

- To enable the learner to communicate effectively and appropriately in real life situation.
- To use English effectively for study purpose across the curriculum.
- To revise and reinforce structure already learnt.
- To develop and integrate the use of four language skills:
  - a) Reading, b) Writing, c) Listening and d) Speaking

On completion of this course, the students will be able to:

- Reading Skills: Ability to read English with ability to read English with understanding and decipher paragraph patterns, writer techniques and conclusions.
- Writing Skills: Skill to develop the ability to write English correctly and master the mechanics of writing the use of correct punctuation marks and capital letter.
- **Listening Skills:** Ability to understand English when it is spoken in various contexts.
- **Speaking Skills:** Develop the ability to speak intelligibly using appropriate word stress, sentence stress and elementary intonation patterns.

#### **Subject: VB .NET Programming**

Subject Code: BCA-403T Periods per week: 4 Practicals per week: 4

Duration of period: 50 minutes

#### **Course Objective**

- To guide the beginning programmer in developing applications using the Visual Basic.Net (VB.NET) programming language.
- To program using object-oriented tools is beginning to be treated as fundamental knowledge of the average MIS major.
- To understand object-oriented programming concepts along with the VB.NET syntax to implement them.
- To understand the tools to create more complex examples.

#### **Course Outcomes**

On completion of this course, the students will be able to:

- understand the programming algorithm, process, and structure.
- understand and identify the fundamental concepts of OOPs concepts.
- understand and use the concepts of objects, primitive value, message, method, selection control structure, repetition control structures, object reference, container, and method parameter.
- know how to write and run a complete program.
- understand and identify the importance of object-oriented programming for the Internet based electronic commerce.
- understand the impact of VB.NET on business.

### **Subject: UNIX Shell Programming**

Subject Code: BCA-404T Periods per week: 4 Practicals per week: 4

Duration of period: 50 minutes

- To provide introduction to UNIX Operating System and its File System
- To gain an understanding of important aspects related to the Shell and the process.
- To develop the ability to formulate regular expressions and use them for pattern matching.
- To provide a comprehensive introduction to Shell programming, services and utilities.

On completion of this course, the students will be able to:

- Describe the architecture and features of UNIX Operating System and distinguish it from other Operating System Understanding.
- Demonstrate UNIX commands for file handling and process control Applying.
- Write Regular expressions for pattern matching and apply them to various filters for a specific task.
- Analyze a given problem and apply requisite facets of Shell programming in order to devise a Shell script to solve the problem.

### **Subject: Software Engineering**

Subject Code: BCA-405T Periods per week: 5

Duration of period: 50 minutes

#### **Course Objectives**

- To introduce the students to a branch of study associated with the development of a software product.
- To gain basic knowledge about the pre-requisites for planning a software project.
- To learn how to design of software.
- To enable the students to perform testing of a software.

#### **Course Outcomes**

On completion of this course, the students will be able to:

- Familiarization with the concept of software engineering and its relevance.
- Understanding of various methods or models for developing a software product.
- Ability to analyze existing system to gather requirements for proposed system.
- Skill to design and code a software.

#### **BCA Semester-V**

### Subject: Data Communication & Networking Subject

Subject Code: BCA-501T Periods per week: 5

Duration of period: 50 minutes

- Introduce students to the evolution of computer networks and the concepts data communication.
- Introduce students the general principles of network design and compare the different network topologies.
- Introduce students to the digital and analogue representations and channels.
- Describe the mechanism and techniques of encoding.
- Introduce students to the general principles of circuit and packet switching
- Introduce students to the wireless Local Area Networks
- Provide students with in-depth knowledge of data link layer fundamental such as error detection, correction and flow control techniques; multiple access control techniques.

On completion of this course, Students will be able to:

- understand the fundamental concepts of data communications and networking.
- understand the concept data communication within the network environment.
- udentify different components and their respective roles in a computer communication system.
- understand the conflicting issues and resolution techniques in data transmission.
- apply the knowledge, concepts and terms related to data communication and networking.
- appreciate usefulness and importance of computer communication in today life and society.

### **Subject: Artificial Intelligence**

Subject Code: BCA-502T Periods per week: 5

Duration of period: 50 minutes

### **Course Objectives**

- To provide a strong foundation of fundamental concepts in Artificial Intelligence
- To provide a basic exposition to the goals and methods of Artificial Intelligence
- To enable the student to apply these techniques in applications which involve perception, reasoning and learning

#### **Course Outcomes**

On completion of the course students will be able to:

- Understand the various searching techniques, constraint satisfaction problem and example problems- game playing techniques.
- Apply these techniques in applications which involve perception, reasoning and learning.

- Explain the role of agents and how it is related to environment and the way of evaluating it and how agents can act by establishing goals.
- Acquire the knowledge of real world Knowledge representation.
- Analyze and design a real world problem for implementation and understand the dynamic behavior of a system.
- Use different machine learning techniques to design AI machine and enveloping applications for real world problems.

#### **Subject: Java Programming Language**

Subject Code: BCA-503T Periods per week: 4 Practicals per week: 4

Duration of period: 50 minutes

#### **Course Objectives**

- To learn the syntax and semantics to write Java programs.
- To understand the fundamentals of object-oriented programming in lava.
- To familiarize with the concept of inheritance, polymorphism, packages and interfaces.

#### **Course Outcomes**

On completion of the course students will be able to:

- Skill to write Java application programs using OOP principles and proper program structuring.
- Ability to create packages and interfaces.
- Ability to implement error handling techniques using exception handling.

### **Subject: Analysis And Design of Algorithms**

Subject Code: BCA-504T Periods per week: 5 Practicals per week: 4

Duration of period: 50 minutes

- To teach paradigms and approaches used to analyze and design algorithms and to appreciate the impact of algorithm design in practice.
- To make students understand how the worst-case time complexity of an algorithm is defined, how asymptotic notation is used to provide a rough classification of algorithms.
- To explain different computational models (e.g., divide-and-conquer), order notation and various complexity measures (e.g., running time, disk space) to analyze the complexity/performance of different algorithms.

 To teach various advanced design and analysis techniques such as greedy algorithms, dynamic programming & Know the concepts of tractable and intractable problems and the classes P, NP and NPcomplete problems.

#### **Course Outcomes**

On completion of the course students will be able to:

- Ability to analyze the performance of algorithms.
- Ability to choose appropriate algorithm design techniques for solving problems.
- Ability to understand how the choice of data structures and the algorithm design methods impact the performance of programs.
- To clear up troubles the usage of set of rules design methods including the grasping approach, divide and overcome, dynamic programming, backtracking and department and certain.
- To understand the variations among tractable and intractable problems.

**Subject: Project** 

Subject Code: BCA-506P Practicals per week: 6

Duration of period: 50 minutes

#### **Course Objectives**

- To learn languages to code front end and back end of a software.
- To initiate into the process of designing, coding and testing a software module.
- To develop a complete software module.

#### **Course Outcomes**

On completion of the course students will be able to:

- Skill to apply Software Development Cycle to develop a software module.
- Ability to use the techniques, skills and modern engineering tools necessary for software development.
- Develop a software product along with its complete documentation.

#### **BCA Semester-VI**

**Subject: Systems Programming** 

Subject Code: BCA-601T Periods per week: 5

Duration of period: 50 minutes

- To introduce the students about the system software and its application.
- To understand the working of different translators viz. Assembler and Compiler.
- To learn about the instructions of assembly language.
- To familiarize with various software development tools.

On completion of the course students will be able to:

- Detailed knowledge of Compilation process of a program.
- Knowledge of internal working of macro processor.
- · Familiarization with Assembly language.
- Understanding the working of linker and loaders components used during the process of program execution.

#### **Subject: Professional and Business Communication**

Subject Code: BCA-602T Periods per week: 5

Duration of period: 50 minutes

### **Course Objectives**

- To provide an overview of Prerequisites to Business Communication.
- To put in use the basic mechanics of Grammar.
- To provide an outline to effective Organizational Communication.
- To underline the nuances of Business communication.

#### **Course Outcomes**

On completion of the course students will be able to:

- effective business writing.
- effective business communications.
- research approaches and information collection.
- developing and delivering effective presentations.
- effective interpersonal communications.
- skills that maximize team effectiveness.
- good time management.
- effective problem solving.

### **Subject: Web Programming**

Subject Code: BCA-603T Periods per week: 4 Practicals per week: 4

Duration of period: 50 minutes

### **Course Objectives**

- To learn various Web Technologies.
- To enable the students to design and implement static and dynamic Web pages.
- To acquire fundamental skills to maintain web server services required to host a website.
- To learn MySQL.

#### **Course Outcomes**

- Ability to develop web pages using HTML and Cascading Style Sheets.
- Skill to create XML documents and Schemas.
- Knowledge of client-side (JavaScript) and server-side scripting (PHP, ASP.NET) languages to build dynamic web pages.

- Familiarization with Web Application Terminologies, Internet Tools, E Commerce and other web services.
- Ability to develop database applications with MySQL.

**Subject: Project** 

Subject Code: BCA-604P Practicals per week: 12

Duration of period: 50 minutes

### **Course Objectives**

- To learn languages to code front end and back end of a software.
- To initiate into the process of designing, coding and testing a software module.
- To develop a complete software module.

#### **Course Outcomes**

On completion of the course students will be able to:

- Skill to apply Software Development Cycle to develop a software module.
- Ability to use the techniques, skills and modern engineering tools necessary for software development.
- Develop a software product along with its complete documentation.

## SRN ADARSH COLLEGE, Chamrajpet, Bengaluru - 560018

## **Mapping of Course Outcome**

Year: 2016-19

| Subject: E | ENGLISH                   |                  |                  |                        |              |           |                         |                    |                                  |        |                           | Course: I          | SEM BCA            |

**Financing of foreign trade:** To explain international marketing benefits and to know the product decision and promotion decisions pricing decision and distribution decision steps

- **C04 Integration between countries:** To understand international regional trading blocs **1.3 Macro Economics for Business Decision**
- **CO-1: Introduction to economics-** To explain types of economic system national income concept and problems in computation of national income
- **CO-2: Consumption savings investment-** To know the relationship between all the three and paradox of thrift
- **CO-3: Money-** To explain financial intermediaries and countries monetary and fiscal policies Co4 economic growth to know the factors effects economic growth and models of growth, business cycle
- **CO-4: Economic growth-** To understand the factors determine the economic growth, model and policies made towards economic stability.

# 1.4 Information systems and computers

- **CO-1: Information systems and their role business:** To know management support system and accounting information system
- **CO-2: It GRC-** To Understand Information System and Audit Standards **CO-3: Overview of Specific Section of It Act 2008-** To understand electronic contracting digital signature cyber offence and certifying authorities
- **CO-4: Database definition-** To know database management system software creation addition and modification
- **CO-5: Spreadsheet software: T**o analyse Excel functions and page layouts

# 1.5 Advanced Financial Management

- **CO-1: Introduction two financial functions:** To know capital structure theories and elements of capital structure
- **CO-2: Investment decisions:** To understand capital budgeting decisions and investment decisions with complex investment decisions
- **CO-3: Risk analysis in capital budgeting:** To explain nature of risk and statistical techniques for risk analysis

- **CO-4: Corporate restructuring:** To know mergers and acquisition and the process and completion of mergers and acquisition
- **CO-5: Derivatives for managing financial risk:** To understand the concept of hedging and instruments of hedging like options futures forwards and swaps

# 1.6 Human resources management

- **CO-1: Nature and scope of human Resource management:** To know the concept of HRM and its functions principles and models
- **CO-2: Human resource planning:** To understand planning process importance of planning job evaluation wage policies in India and training and development process
- **CO-3: Employee safety and health:** To explain the importance of employees safety e and the policies available for employees health and solving the industrial disputes with the help of trade
- **CO-4: Human resource audit**: Here we will understand audit of employee satisfaction corporate strategy while auditing and ethical issues in HRM

#### 1.7 COMMUNICATION SKILLS

- **CO-1: Communication in business:** To know the importance of communication different stages difference between oral and written communication
- **CO-2: Oral communication skills:** To understand barriers of oral communication creativity in oral communication and communication through video and Skype etc.
- **CO-3: Written communication skills:** To learn stages of writing creativity in written communication use of pictures and diagrams and how to write commercial letters emails messages etc.
- **CO-4: Listening skills:** To understand the importance and need of listening skin types judgement developing skill features of good listener
- **CO-5: Interpersonal communication skill:** To know teamwork and characteristics of team features of successful team etc

# 2.1 Indian banking

- **CO-1: Evolution of banking institutions in India:** To know the origin of banking sector and its growth and types along with the banking reforms of 1990
- **CO-2: RBI and its Role:** To understand the policies made by RBI for the effective functioning of bank
- **CO-3: Monitoring and Follow up:** To know the IRAC Norms, classification of assets, and e-banking
- **CO-3: BASEL I II and III:** To know the Importance of basel committee, and RBI prudential norms
- **CO-4: Banking Innovations:** To understand the new innovations in banking fields, and eservices

# 2.2 Risk Management

- **CO-1: Definition of Risk and uncertainty:** To understand the risk, sources of risk, risk avoidance and techniques of risk reduction
- **CO2 Introduction to risk management:** To understand the types and evolution of risk and steps in risk management
- **CO3 Credit risk credit risk management models:** To study about risk management models and credit derivatives
- **CO4 Market risk includes asset liability management:** To learn about asset liability management and different methods of market risk
- **CO5 Operational risk to understand introduction:** To operational risk measuring of operational risk and methods to implement in banks to avoid operational risk
- CO6 Forest management derivative: To learn about future options Swaps and ECGA

# 2.3 Advanced Ecommerce and Mobile Commerce

- **CO1 threats in e commerce**: To know the concept of e commerce applications benefits and components of e-commerce
- **CO2 Overview of electronic payment systems:** To know the different methods of electronic payment such as smart cards cyber-cash EFT risk of e payment

**CO3 M COMMERCE:** To understand M commerce types of M commerce technologies benefits of M commerce and its applications

**CO4 A framework for the study of mobile commerce:** To understand classification framework for mobile location-based services and formulation in Mobile communications network 2G 3G and 4G technologies

**CO5 The ecology of mobile Commerce**: To know the wireless application protocol adoption and diffusion m-commerce in the automotive industry and M commerce Business models

#### 2.4 Business research methods

**CO1 research:** To understand the meaning purpose and scientific method of research under review of literature

**CO2 Selection and formulation of a research problem:** To know the steps of formulation of research and hypothesis and Research design preparation and components of Research design

**CO3 Data**: To understand the importance of data sources of data and collection methods of data and graphical representation of data

**CO4 Analysis of data:** To understand simple statistical techniques and their uses for analysis of data and testing of hypothesis also research writings skill

# 2.5 Operations research and quantitative techniques

**CO1 Linear programming:** To understand the concept of linear programming and formulation of LPP and its representation through graphical method and simplex method and other applications of LPP

**CO2 Probability:** To know basic rules of probability trouble little distributions risk analysis in capital budgeting

**CO3 Network analysis**: To understand the methods of network analysis PERT AND CPM software packages of network analysis along with the inventory models

**CO4 Decision making under uncertainty:** To understand the different methods available for decision making like decision trees simulation model building etc.

#### 2.6 Business Marketing

**CO1 Nature of business marketing:** To understand the concept of business marketing difference between business and consumer and to know the organisational buying and buying behaviour

- **CO2 Buyer seller relationship:** To know the relationship management relationship marketing e commerce and supply chain management
- **CO3 Marketing research and marketing intelligence**: To know the role of marketing in strategic planning
- **CO4 Pricing strategies and new product development**: To learn product strategies and impact of technologies in new product classification development process and distribution channels and marketing logistics
- **CO5 Business communication:** To understand the business communication program industrial advertising and media used for industrial advertising

#### 2.7 Microfinance

- **CO1 Introduction to finance:** To understand the meaning and definition of finance financial arrangements and the types of finance
- **CO2 Financial institutions:** To understand the establishment of financial institutions objectives and its functions
- **CO3 Micro credit:** To know the concept of microfinance elements and importance of microfinance
- **CO4 Self-help groups:** To know the concept of self-help groups pattern of their functions concept stages and significance of self-help groups
- **CO5 Functioning of self-help groups:** To know the various models available for self-help groups in India their objectives NGO activities role of NGOs in rural development

# 3.1 Business ethics and corporate governance

- **CO1 Ethics in business**: To understand the concept of ethics in Business models of ethics and the types of ethics

# CO-5: HEALTHCARE & INFORMATION TECHNOLOGY ENABLED SERVICES

This unit helps to gain understanding on hospitals, medical services, medical transcription and job opportunities in ITES.

#### PAPER 4.6: BANKING REGULATIONS & OPERATIONS

#### **CO-1: COMMERCIAL BANKS**

This unit will help the students to gain the basic knowledge of the theory and practice of banking and to provide skill in operating banking transactions.

#### CO-2: BANKER & CUSTOMER RELATIONSHIP

This unit will help the students to understand the relationship between Banker & customer. They will be able to recognize different types of customer & account holders.

# **CO-3: NEGOTIABLE INSTRUMENT**

This unit will help the students understand the meaning of negotiable instrument &its types. They will be familiarizing with concepts of crossing & types of cheques.

#### CO-4: PAYING BANKER & COLLECTING BANKER

This unit will help the students will be able to recognize the difference between paying banker & collecting banker.

# **CO-5: PRINCIPLES OF BANK LENDING**

This unit will help the students to understand different kinds of borrowing facilities.

# **PAPER 4.7: COST ACCOUNTING**

#### CO-1: INTRODUCTION TO COST ACCOUNTING

This unit will help the students to understand the meaning of cost, costing & cost accounting.

#### **CO-2: MATERIAL COST CONTROL**

This unit will help the students to understand meaning & types of indirect & direct material.

# **CO-3: LABOR COST CONTROL**

This unit will help the students will understand time keeping, ideal time& overtime & also different methods of labor remuneration.

#### CO-4: OVERHEAD COST CONTROL

This unit will help the students to understand the classification, allocation of overheads. They will also understand different methods of apportionment of overheads.

# CO-5: RECONCILIATION OF COST & FINANCIAL ACCOUNTS

This unit will help the students to understand the various reasons for differences' in profit or loss shown by cost accounts & financial accounts. At the end they will be able to prepare reconciliation statement.

#### V SEMESTER BBA

#### PAPER 5.1: ENTREPRENEURSHIP MANAGEMENT

#### **CO-1: ENTREPRENEURSHIP**

This unit will help the students understand the concept & importance of Entrepreneurship and facilitate generation of young entrepreneurs.

#### **CO-2: SMALL SCALE INDUSTRIES**

This unit will help the students to understand the importance & role played by SSI in the development of nation.

#### CO-3: STARTING A SMALL INDUSTRY

This unit will help the students to develop project proposal to start an SSI.

#### **CO-4: PREPARING THE BUSINESS PLAN**

This unit will help the students to prepare a business plan.

# CO-5: IMPLEMENTATION OF THE PROJECT & SICKNESS IN SSI'S

This unit will help the students to know the causes of industrial sickness and various remedial measures for sick industries.

#### PAPER 5.2: COMPUTER APPLICATION IN BUSINESS

# **CO-1: INTRODUCTION TO INFORMATION SYSTEM**

This unit will help the students to understand the components of business information systems.

#### **CO-2: TYPES OF INFORMATION SYSTEMS**

This unit will help the students to apply the various information systems according to type of business.

#### **CO-3: MS OFFICE**

This unit will help the students to operate MS word, MS excel, MS PowerPoint & apply the same in day to day business.

#### **CO-4: DATA BASE MANAGEMENT**

This unit will help the students to understand the types of systems data base systems & languages & also the role of database administrator.

#### **CO-5: ACCOUNTING SOFTWARE**

This unit will enable the students to use tally in day to day business activity.

#### **PAPER 5.3: INVESTMENT MANAGEMENT**

#### CO-1: INTRODUCTION TO INVESTMENT MANAGEMENT

This unit will help the students to understand the types of financial assets, various risks involved in investments.

# **CO-2: SECURITIES ANALYSIS**

This unit will help the students to analyze various securities.

#### **CO-3: PORTFOLIO MANAGEMENT**

This unit will help the students in selecting securities.

# CO-4: PORTFOLIO MANAGEMENT STRATEGIES.

This unit will help the students to understand the management strategies of equity portfolios.

#### **CO-5: MUTUAL FUNDS**

This unit will help the students to understand various types of mutual funds & international investments.

#### PAPER 5.4: MANAGEMENT ACCOUNTING
